

Network Cable

Network Cable

Network cable is one of recommended connecting cords of China HEFS, including three series : Network cable-7001, Network cable-7002, Network cable-7002.

Network cables are widely applied in multiple media and LAN such as digital speech communication, electrical image, image correspondence. Meanwhile, network cables make a big difference in modern information times. They are vital connecting cords which play an increasing important role in our life. HEFS series network cables have successively passed various international certifications, such as: UL, VDE, TUV, GS etc. due to their sound quality and stable performance.

HEFS series network cables have a good transmission performance with big ACR and great crosstalk ratio. Every twisted pair is designed according to certain rules making the cable provide protection against signals from inherent interference and external electromagnetic interference. The high precision of the insulating external diameter will prolong the service life of HEFS series network cables. We also supply various speaker cables, power cables
